

Medical Device Asset Tracking and Inventory Management

Build your application the way you like it.

Align IT expenditures with business objectives, and quickly implement your own sophisticated, feature-rich asset and inventory management applications configured specifically to meet your workflow requirements.

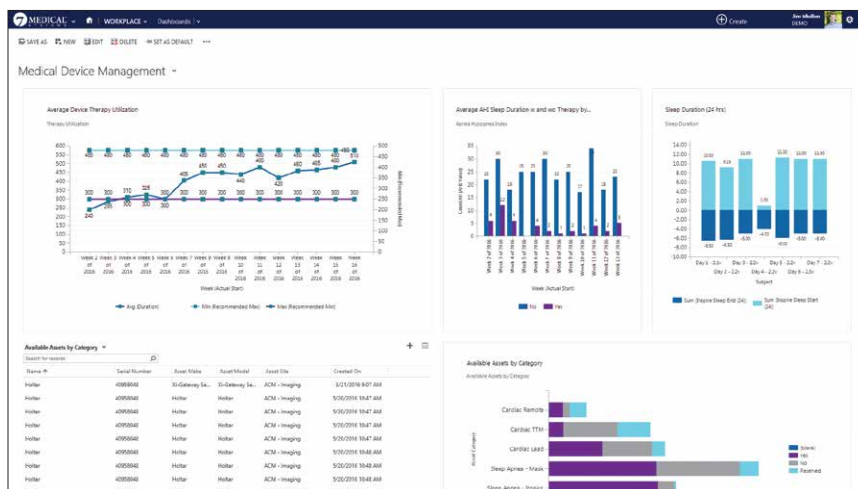

X-HIS® uses a flexible service-oriented architecture to ensure reliability and interoperability—all at the price you can afford. X-HIS is the fastest, easiest way to increase efficiency by automating workflows, saving you time and money.

Asset Tracking and Location

Inventory Management

Medical Device and Data Management

Medical Device Data Management

Collect and store structured clinical data from any device in a clinical data repository (CDR). Once in the CDR, data can be stored, forwarded or analyzed for business intelligence and informed decision making.

Asset Tracking

Track the location of any device or physical asset using any number of technologies:

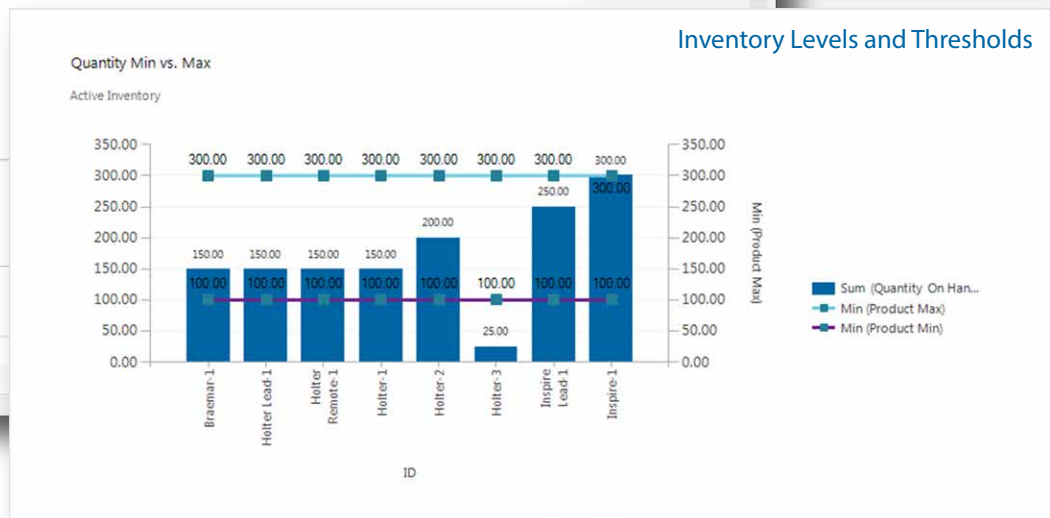

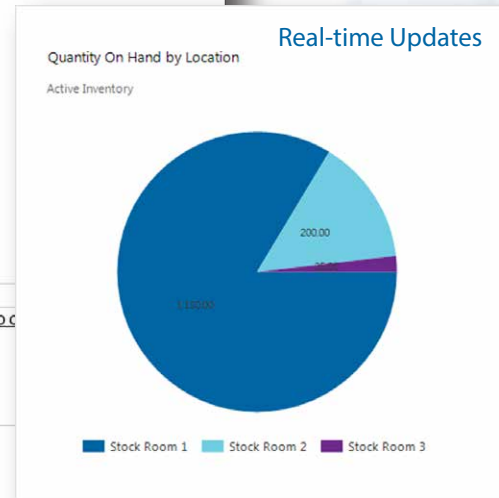

- RFID
- Barcodes
- NFC
- GPS
- Wi-Fi
- Infrared
- Bluetooth

Inventory and Supply Chain Management

Efficiently manage inventory levels, stocking orders, sales and deliveries.

- Contract Management
- Stocking locations/levels
- Low Inventory Alerts
- Purchase Requisition/Order
- Order Management
- Shipping & Receiving
- ERP Integration
- Financial Integration
