Xi-Imaging™ PACS delivers a robust, best-practice solution for your imaging strategy flexible enough to adjust to your evolving business needs. The system strikes the right balance to meet your clinical, financial and operational requirements. That means you can save time and do more with what you already have—like work faster, see more patients, improve quality and reduce patient cycle times. These are all within reach when you have the right system and the right information when you need it.

Key Advantages

- **360° Patient Timeline View.** Timeline view gives a complete snapshot of patient’s history and facilitates drill-down to detail.
- **Sharing & Collaboration.** An efficient system for image storage, routing and integration, enabling collaboration across the care team.
- **Vendor Neutral Archive.** Images and reports are stored in native DICOM format and easily interfaced and shared with other systems.
- **Advanced Visualization.** Superfast anytime, anywhere viewing of images and structured reports from one universal thin-client viewer supporting all advanced visualization techniques.
- **Mobile-ready.** Zero-client web viewer that supports fast, on-the-go viewing of files on tablets and mobile devices.
- **Integration.** X-Connect™ integration easily migrates or exchanges images and other data to/from practice management, radiology information, electronic medical records, billing and other systems.
- **Affordable & Scalable.** Cloud-based solution eliminates large upfront capital expenses in favor of an affordable monthly fee based on usage. A scalable, expandable architecture allows you to add unlimited incremental capacity as you need it.
- **24/7 Support.** Fully managed solution includes 24/7 support to ensure anywhere, anytime access and troubleshooting for users.
- **Risk Management.** System is hosted in a state-of-the-art data center that includes backup and disaster recovery benefits, as well as HIPAA compliance, to minimize risk and give you peace of mind.

- Cardiology
- Imaging Centers
- Mammography
- Neurology
- OB/GYN
- Oncology
- Orthopaedics
- Rural Hospitals
- Radiology Groups
- Teleradiology
- Any specialty
How It Works

Xi-Imaging™ PACS is an intelligent, cloud-based solution that manages, stores, compresses, encrypts and distributes imaging orders, studies and reports across your site, your radiology group, referring physicians and other related sites.

Advanced Visualization

Xi-View™ Pro is an advanced thin-client viewer that displays images at full diagnostic quality and supports the most advanced visualization techniques.

For easy, on-the-go access, Xi-View™ web has built-in support for viewing on mobile devices like smartphones and tablets.

Futureproof your imaging strategy today.
